

Guidelines for Submission to Virtual Geoscience Conference 2016 (VGC 2016)

Simon J. Buckley^{1*}, Nicole Naumann¹, Tobias H. Kurz¹
& Michel Jaboyedoff²

¹ Uni Research CIPR, P.O. Box 7810, N-5020 Bergen, Norway; simon.buckley@uni.no

² Risk Analysis Group, University of Lausanne, Lausanne, Switzerland

Key words: Lidar, photogrammetry, geoscience, UAVs, hyperspectral.

This document presents the mandatory instructions to authors for the preparation of submissions to VGC 2016. Abstracts should be between 300-500 words in length and may include 1-2 figures showcasing the contribution of the proposed research. The abstract should be no longer than two A4 pages. Submissions may be made using Microsoft Word, or as a PDF. Consistent formatting between submissions allows the final abstract volume to be published in a uniform way.

Font: use Times New Roman (16 point, bold for main title; 10 point for main text; italic for affiliations and key words).

Include all authors and affiliations as shown above. For each institution, please indicate address and country. Corresponding author should be indicated with superscript*, and their email address supplied. Separate authors' names with a comma except between the last ones where "&" should be used. Please choose three to six key words representing the themes of your submission.

Figures: 1-2 figures may be included to illustrate your contribution. For highest impact, figures should be as self-explanatory as possible when combined with the abstract body and a short caption (Fig. 1; Fig. 2). Please compress your images, where possible, to reduce the final document file size.

Figure 1: Photorealistic outcrop model acquired using laser scanning. Left: coloured by dip; right: image texture.

References may be included if necessary, and cited in the text (JABOYEDOFF, 2012). If there are two authors please separate the names using "&", as in (HUMAIR & MATASCI, 2013). In the case of more than two authors, indicate only the first author's name followed by *et al.*, as in (SIMA *et al.*, 2013). Indicate author names using small caps. References, where used, should be listed in alphabetical order at the end of the paper following the format presented below.

Acknowledgements: may be optionally included to acknowledge funding bodies, industry support or other contributions.

Figure 2. Add a figure with simple caption to help showcase the impact of your research.
